On the 14. day in the morning early, you may ſee Venus and the Moon together. On the 19 day ſhe will be with Mercurie in the Weſt. On the 22 day Saturn will be with her, at ſix a clock at night. Jupiter is with her on the 25 and Mars on the 27 day. But on the 28 day may be rain: and on the three laſt dayes ſomething warm and temperate.

Full moon the 6th day, 14 min. past one in the morning.
Last quarter the 9 day, about 6 in the morning.
New moon the 16 day, about 4 in the morning.
First quarter the 23 day, 41 minutes past 7 at night.
Full moon the 30 day, 23 minutes past 6 at night.

April hath xxx. dayes.

On the third day the air is darkned and cooled by the conjunction of Saturn with the sunne. Mars being in a quadrate with Mercurie on Easter day, raiseth some suddain blasts, which may blow up rain by reason that Venus is in the like aspect with the moon on the morning after. On the 18 day you may see Jupiter near the moon, and on the 21 day Marsis with her; when will be also port opening in the heavens, producing thunder and many storms.

Venus and Mercurie are twice in conunction this moneth on the 12 and 15 dayes: at the laſt which, the Moon is with them. It ſeems to be a ſign of wind and much wet then. On the 18 day Saturn is with the noon, but hid under the beams of the Sun. On the 21 day you may ſee Jupiter with the Moon in the weſt: and on the 24 day, the and Mars are together about midnight.
